RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . on the vaso-motor center. In the cross-circulation experiment of October 7th, 1892, chloroform was administered to the fed and carried to the fed's heart only and not to its brain. The tracing of this experiment shows that concentrated chloroform inhaled in the most rapid manner possible and conveyed to the heart only did not produce anaesthesia, or failure of the respiration, or fall of blood pressure; in fact it produced no effect on the animal of any kind. Taken together the two experiments complete and terminate the work of the Hyderabad Commission. They prove that chloroform has no direct action whatever on the heart, and consequently that the fall of blood pressure caused by the administration of chloroform is not due primarily or in any direct manner to a weakening of the heart's action. They further prove that the fall of blood pressure, which is a normal condition of chloroform anaesthesia, is due to the direct action of chloroform on the vasomotor center in the medulla oblongata--i. e. , to vaso-motor narcosis. It is for this reason that the fall of blood pressure is, as the Commission has never attempted to make its conclusions retrospective; personally I have had in times gone by far too many of what my friend Dr. Dudley Buxton calls narrow shaves to feel anything but the most profound sympathy for any man who has an accidental death under chloroform; but it is obvious henceforth, if chloroform is to be employed at all,...
