

Classification in the Information Age

By Wolfgang Gaul

Springer Jul 1999, 1999. Taschenbuch. Book Condition: Neu. 244x170x33 mm. This item is printed on demand - Print on Demand Neuware - nd Selected papers presented at the 22 Annual Conference of the German Classification Society GfKI (Gesellschaft für Klassifikation), held at the University of Dresden in 1998, are contained in this volume of 'Studies in Classification, Data Analysis, and Knowledge Organization'. One aim of GfKI was to provide a platform for a discussion of results concerning a challenge of growing importance that could be labeled as 'Classification in the Information Age' and to support interdisciplinary activities from research and applications that incorporate directions of this kind. As could be expected, the largest share of papers is closely related to classification and-in the broadest sense-data analysis and statistics. Additionally, besides contributions dealing with questions arising from the usage of new media and the internet, applications in, e.g., (in alphabetical order) archeology, bioinformatics, economics, environment, and health have been reported. As always, an unambiguous assignment of results to single topics is some times difficult, thus, from more than 130 presentations offered within the scientific program 65 papers are grouped into the following chapters and...

Reviews

It is an awesome publication which i actually have ever read through. it had been writtern really properly and valuable. I found out this book from my i and dad recommended this pdf to discover.

-- Doyle Schmeler

This book is definitely not simple to begin on studying but quite fun to see. I actually have read and that i am sure that i will gonna read through yet again once again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
