## **DIGITISING THE INDUSTRY: INTERNET OF THINGS CONNECTING THE PHYSICAL, DIGITAL AND VIRTUAL WORLDS (HARDBACK)**

River Publishers, Denmark, 2016. Hardback. Book Condition: New. 234 x 156 mm. Language: English . Brand New Book. This book provides an overview of the current Internet of Things (IoT) landscape, ranging from the research, innovation and development priorities to enabling technologies in a global context. A successful deployment of IoT technologies requires integration on all layers, be it cognitive and semantic aspects, middleware components, services, edge devices/machines and infrastructures. It is intended to be a standalone book in a series that covers the Internet of Things activities of the IERC Internet of Things European Research Cluster from research to technological innovation, validation and deployment. The book builds on the ideas put forward by the European Research Cluster and the IoT European Platform Initiative (IoT-EPI) and presents global views and state of the art results on the challenges facing the research, innovation, development and deployment of IoT in the next years. The IoT is bridging the physical world with virtual world and requires sound information processing capabilities for the digital shadows of these real things. The research and innovation in nan electronics, semiconductor, sensors/actuators, communication, analytics technologies, cyber- physical systems, software, swarm intelligent, and deep learning systems are essential for the successful deployment of IoT applications. The emergence of IoT platforms with multiple functionalities enables rapid development and lower costs by offering standardised components that can be shared across multiple solutions in many industry verticals. The IoT applications will gradually move from vertical, single purpose solutions to multi-purpose and collaborative applications interacting across industry verticals, organisations and people, being one of the essential paradigms of the digital economy. Many of those applications still have to be identified and involvement of end- users including the creative sector in this innovation is crucial. The IoT applications and deployments as integrated building blocks...
