paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 187 Publisher: Northwestern University Press. Pub. Date :2007-08. Book As students learn the finite element method of entry materials. focusing on basic concepts and mechanics from the start. the basic theory of finite element method. finite element method for elasticity equations establish the basic. unit characteristics and give the system about the solution method. including the elasticity of 2D and 3D problems. plate bending problems. two-dimensional and three-dimensional parameters such as units. and large bandwidth optimization solution of equations such as finite element method the basic theory and methods. and briefly describes the nonlinear. dynamic problems finite element method. the final chapter describes several examples of engineering applications of finite element method. Book as a civil engineering undergraduate teaching materials are also available for graduate students and related professionals engaged in teaching. research. design and construction professionals working reference. Contents: Chapter 1 Introduction 1.1 The development of the finite element method 1.2 Finite element method outlined the basic concept of the finite element method in the matrix 1.3 Review 1.4 Knowledge of basic equations of elasticity and thinking exercises in Chapter 2 truss finite element method 2.1 Overview 2.2 frame structures and cell types 2.3 discrete local coordinate system the element stiffness matrix coordinate transformation 2.4 2.5 2.6 overall stiffness equation of the formation of the formation of 2.7 total load vector displacement boundary conditions introduced amendments to the overall stiffness of the equation 2.8 according to the nodal displacements obtained component. the cell s internal forces and stresses thinking and exercises in Chapter 3 elastic finite element method basic principles and methods 3.1 virtual work and minimum potential energy principle 3.2 of the basic equation of...
