

## Bulletin of the Agricultural Experiment Station of Nebraska Volume 21-38 (Paperback)

By University Of Division

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: . the application of a certain fertilizer, or combination of fertilizers, is tabulated below. The beets are valued in accordance with the factory prices paid in this state, the fertilizers according to their actual cost, and the lime residues from factory at the estimated cost of hauling five miles. The sugar manufacturers of this stale make no charge to their patrons for this material. The loss or gain on any subplat due to the use of any fertilizer is based upon the value of the beets raised upon the unfertilized subplat. It is interesting, in connection with this experiment, to note the variation in the chemical composition of the soils of some of these fertilized subplats, and compare these with that of an adjacent field which may be considered as representing the subplat not fertilized, as the character of the soil is the same. The following...
