Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from **The Etymologic Cipher Alphabet of One Hundred and Twenty Letters With a New Arithmetic System** In introducing the Etymologic Cipher Alphabet to the public, the author would briefly observe that he was, from practical linguistical knowledge led to develop this Alphabet on etymologic principles, as an attempt to supply an educational want which had too long existed in linguistical works, - that of a uniform Book Alphabet for all languages from which the natives and foreigners might learn the sounds of their vernacular language, and of the human voice as recorded by letters. In teaching the phonetic elements of any language, the only rational and successful method of conveying a proper knowledge of it to the learner, is through the medium of the sounds of the language which he already in some measure is acquainted with; and pursuant to this principle, our consonant and vowel examples are mostly given in identical German, English and French etymologic key words. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
